

REACH Declaration of Conformity

As of July 2007, regulation 1907/2006/EG of the European Parliament and Council of December 18, 2006 on the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH) came into force.

According to the REACH Regulation 1907/2006/EG, a product is an object that is given a specific shape, surface and design through the manufacturing process, which determines its function to a greater extent than the chemical composition.

As a manufacturer, importer and supplier of articles, we are obliged under REACH, among other things, to inform our customers about substances of very high concern (SVHC) in our products if an SVHC is present in a product in a concentration >0.1 mass -% is included.

Since our customers do not accept SVHC in the products we deliver, we generally assume in this context that the products we purchase do not contain any of the substances of very high concern (SVHC) of the current ECHA candidate list and that the products comply with the provisions on Substance bans and restrictions according to REACH regulation. For this reason, we ask our suppliers to report promptly if SVHC concentrations are exceeded and | or the products do not conform to substance bans and substance restrictions according to REACH.

We hereby confirm that the products supplied by us are not SVHC candidates (candidate list as of January 17th, 2023) according to Art. 33(2) of Regulation (EC) No. 1907/2006 (REACH) above 0.1% by mass are included.
